

Read Me First

Before you open ProfitCheck.

What you purchased

ProfitCheck is a self-contained HTML decision tool for Etsy digital-product sellers. It helps you estimate product profitability, pricing, time return, and next actions.

- ProfitCheck.html â the interactive tool
- Quick-Start-Guide.pdf â the basic setup instructions
- Example-Product-Guide.pdf â a worked example
- License.txt â usage rights and restrictions

Open the tool

- Unzip the download first.
- Open ProfitCheck.html in a desktop browser.
- Chrome, Edge, and Safari are recommended.
- No account, subscription, AI tool, or Etsy connection is required.

Your saved data stays in your browser on your device. Use your own backup process if the data is important.

Compatibility

- Designed primarily for Windows and Mac desktop computers.
- Android may work depending on the browser and file manager.
- iPhone and iPad are not the primary supported platforms for local HTML files.
- Do not upload sensitive customer information into the tool.

Before you rely on a result

- Review the Etsy Fee Settings for your own country and payment setup.
- Use estimated language for software, asset, and advertising costs.
- This is a business-planning tool, not tax, legal, or accounting advice.
- The tool does not guarantee sales, rankings, revenue, or profitability.

Need help?

Start with the Quick-Start Guide. If a calculation looks unexpected, check the fee assumptions, discount, product costs, sales count, and creation hours first.
